COPE Project

Promoting innovation through Cooperative model
in entrepreneurship education for adults

THE BACKGROUND

COPE IS AN ERASMUS+ PROJECT STARTED IN 2020

COPE

A significant part of the EU economy is nowadays known as social economy, meaning that the major goal is to serve members of the community rather than to seek profit.

Throughout Europe there is a long tradition of cooperative business. However, despite the great weight of this social economy there is still a great need in increasing the number of cooperatives and promoting social businesses for a more sustainable development.

The diffusion of the cooperative model can be the engine for social innovation, through innovative start-ups answering to people's needs and can bring local development and contribute in the long term to the reduction of unemployment and social inequalities.

In partners' countries (Sweden, Italy, Island and Cyprus) despite the high number of cooperatives present in different sectors there is still a lack of entrepreneurial skills and trainers adequately trained and capable of motivating new people in pursuing the cooperativist model.

There is a recognized need in exchanging experiences among trainers and cooperative associations and collect successful experiences that can be implemented in other similar European realities following a common and successfull model.
